☎☎☎☎☎☎☎HAPPENING!!! CALLING EVERY PEDE TO BUMP THIS NOW. FULL LIST OF VOTES SWITCHED OR ERASED BY DOMINION!!! AND ALL THE EVIDENCE!!! THIS IS A NUKE☎☎☎☎☎☎☎☎ - The Donald

☎☎HUGE UPDATE COMMING. LADIES AND GENTS WE GOT EM☎☎ [STATUS: NOT RELEASED]

EVERY THING YOU'RE ABOUT TO READ IS VERIFIED AND WAS MADE BY THIS PEDE [CENTIPEDE] HE DID ALL THE HEAVY WORK

🏆 https://thedonald.win/u/PedeInspector/ 🏆

☎☎☎☎EDIT NOV 12: ☎☎☎

UPDATED LIST: https://pastebin.com/X6sW2aew

EDIT 2 : Link to the updated script, note, it'll have to be modified to check for the 2nd case scenario, by default it'll check just 1st case scenario, criticism is welcome but I already know the script is a mess, but I'm also confident in the results it gives.

https://workupload.com/file/DV4TvqtWEK8 Here is the script.

https://workupload.com/file/aTKhxPg2RTr And here is the data used.

Place both in the same folder.

FULL THREAD: https://thedonald.win/p/11Q8XQIWRs/-happening-ive-updated-the-switc/

The data shows serious IREGULARITIES and there should be a full investigation into the Dominion system to determine what really happened on election

☎"Switched did happen for Biden to Trump, as some of you have pointed out, and they also happened from 3rd party to (mainly Biden) both.☎ The results should disturb everyone.

.

REMINDER: THIS DOESN'T TAKE INTO ACCOUNT ALL THE HUNDRED THOUSANDS OF TRUMP VOTES DESTROYED, BURNED AND RIPPED APART, THE THOUSANDS OF BALLOTS JUST MARKED FOR BIDEN. THIS IS THE EVIDENCE WE'VE FOUND SO FAR.

....

I saw the video on The Gateway Pundit [https://www.thegatewaypundit.com/2020/11/breaking-huge-another-system-glitch-captured-live-cnn-election-night-20000-votes-swapped-trump-biden-video/] and I decided to do some digging of my own, into a more reputable source that can verify that the glitch was indeed real, and that it affected the votes, instead of it being just a display glitch on that news channel. So I went digging into the Edison data [https://static01.nyt.com/elections-assets/2020/data/api/2020-11-03/race-page/pennsylvania/president.json] and I found this damning evidence [https://i.maga.host/RNPN3Oz.png]. As can be seen in the image, only 54 votes were added, but the ratio changed in Biden's favor by a whole 0.6%! This is proof that not only did the glitch happen, but it doesn't seem to have been reverted at all.

EDIT : BIG UPDATE, I made a script to run through the data and gather all instances where votes switched from Trump to Biden, Lost Votes means that the total amount of votes counted decreased by that amount throughout the counting. I've only done states that use Dominion Voting Systems so far.

EDIT 2: Added ALL the states, and separated by voting systems, although no state uses exclusively one system as far as I know.

Edit 3: Re-ordered the states, first by switched votes, then by lost votes.

🚨🚨🚨🚨🚨🚨🚨🚨🚨🚨🚨

Switched votes are votes that were taken from Trump and given to Biden.

Lost votes are voted that disappeared during the counting, from both candidates.

There might be a small overlap between Switched votes and Lost votes.

🚨🚨🚨WE DECIDED TO LEAVE THIS NUMBERS UP SO YOU CAN SEE HOW OUR RESEARCH HAS EVOLVED.🚨🚨🚨

> Dominion Voting Systems :

Pennsylvania : Switched : 220,883 Lost Votes : 941,248

New Jersey : Switched : 80,242 Lost Votes : 20

Florida : Switched : 21,422 Lost Votes : 456

Michigan : Switched : 20,213 Lost Votes : 21,882

New York : Switched : 18,124 Lost Votes : 623,213

Georgia : Switched : 17,407 Lost Votes : 33,574

Ohio : Switched : 14,965 Lost Votes : 5,102

Virginia : Switched : 12,163 Lost Votes : 789,023

California : Switched : 7,701 Lost Votes : 10,989

Arizona : Switched : 4,492 Lost Votes : 0

Minnesota : Switched : 2,766 Lost Votes : 195,650

Tennessee : Switched : 2,330 Lost Votes : 0

Louisiana : Switched : 2,322 Lost Votes : 0

Illinois : Switched : 2,166 Lost Votes : 54,730

Wisconsin : Switched : 2,078 Lost Votes : 3,408

Colorado : Switched : 1,809 Lost Votes : 0

Utah : Switched : 1,627 Lost Votes : 0

New Hampshire : Switched : 973 Lost Votes : 116

Iowa : Switched : 938 Lost Votes : 477

New Mexico : Switched : 268 Lost Votes : 4,610

Missouri : Switched 0 : Lost Votes : 20,730

Nevada : Switched : 0 Lost Votes : 0

Alaska : Switched : 0 Lost Votes : 0

Washington : Switched : 0 Lost Votes : 0

Hawaii : Switched : 0 Lost Votes : 0

Kansas and Texas use Premier Election Solutions, owned by Dominion Voting Systems.

Texas : Switched : 14,954 Lost Votes : 30,557

Kansas : Switched : 1,674 Lost Votes : 2,154

Election Systems & Software :

Nebraska : Switched : 30,086 Lost Votes : 50

Kentucky : Switched : 8,129 Lost Votes : 23,849

Arkansas : Switched : 3,664 Lost Votes : 20,748

South Carolina : Switched : 2,779 Lost Votes : 2,119

Montana : Switched : 2,330 Lost Votes : 1,276

South Dakota : Switched : 1,347 Lost Votes : 1

North Dakota : Switched : 234 Lost Votes : 681

Maryland : Switched : 203 Lost Votes : 0

North Carolina : Switched : 0 Lost Votes : 15

District of Columbia : Switched : 0 Lost Votes : 0

> Unknown Systems:

Nebraska : Switched : 30,086 Lost Votes : 50

Connecticut : Switched : 3,834 Lost Votes : 272

Massachusetts : Switched : 3,613 Lost Votes : 51

Oregon : Switched 2,557 Lost Votes : 0

Alabama : Switched : 1,170 Lost Votes : 408

Mississippi : Switched : 355 Lost Votes : 0

Maine : Switched : 271 Lost Votes : 35

Rhode Island : Switched : 6 Lost Votes : 13

West Virginia : Switched : 0 Lost Votes : 78,300

Idaho : Switched 0 Lost Votes : 0

Oklahoma : Switched : 0 Lost Votes : 0

Indiana : Switched : 0 Lost Votes : 0

Delaware : Switched : 0 Lost Votes : 0

Vermont : Switched : 0 Lost Votes : 0

NOTE : Lost votes are votes that disappeared, not only for Trump, but overall.

VERIFIED!!!!:

I went looking through the data I got from my script, trying to find if the moment the Antrim glitch happened in Michigan is there. And it is. Here is the Data. [https://static01.nyt.com/elections-assets/2020/data/api/2020-11-03/race-

page/michigan/president.json]

And here is the specific part when the switch happened. [https://i.maga.host/wGuVGZQ.png]

You can see in that picture, that Trump lost 3,096 votes, those all went to Biden. BUT, Trump also lost 2,324 votes, that went nowhere.

EDIT: Those 2,324 were moved from Trump to Jorgensen.

Jorgensen votes = Total votes * (1 - Trump share - Biden share)

Nr.27 : 573,857 * (1 - 0.578 - 0.401) = 12,051

Nr.28 : 574,417 * (1 - 0.568 - 0.406) = 14,935

Jorgensen vote increase from Nr.27 to Nr.28 = 14,935 - 12,051 = 2,884

Total vote increase from Nr.27 to Nr.28 = 574,417 - 573,857 = 560

Jorgensen vote increase - Total vote increase = 2,884 - 560 = 2,324

SOURCES: Here is the data I used:

EDISON DATA: https://static01.nyt.com/elections-assets/2020/data/api/2020-11-03/race-page/pennsylvania/president.json

https://workupload.com/file/LVcwK7AAD8p

The data is from Edison Research, it is used for election coverage by at least ABC News, CBS News, CNN and NBC News. It is also used for the website of the NYT, and probably others as well.

��FROM THE EDISON WEBSITE "Vote Count The NEP provides media organizations with real-time vote results in all 50 states for statewide races, ballot initiatives and House races" 293293

httpss://i.maga.host/wvRRA9m.png

I scraped the data from the NYT website, here [https://static01.nyt.com/elections-assets/2020/data/api/2020-11-03/race-page/pennsylvania/president.json] to check for other states, replace "pennsylvania" in the link with the state you want to check, for states that have spaces in their names, like new york, write new-york instead.

Take this picture for example. [https://i.maga.host/RNPN3Oz.png]

It's like this:

Nr.187 : 2,984,468(Total votes) * 0.566(Trump share of the votes) = 1,689,208.888

Nr.188 : 2,984,522 * 0.56 = 1,671,332.32

Do the same thing for Biden, and you'll see that he gained the votes that Trump lost.

I made a program that basically checks every single change in votes, does the above to check if votes were switched, then adds them all up to get the total amount of switched votes.

Here is the link to a rar file containing all the .json files for the states, and the fraudcatch.py file, you'd need to download python 3.8.2 to use it, click EDIT with idle, then in the window that pops up click Run, to check how many votes were switched from Trump to Biden in a state, you then type findfraud('hawaii') for example, replace hawaii with the name of the file of the state you want to check, the file for new hampshire is named newhamp for example, so findfraud('newhamp'), to check the total lost votes (For both candidates) do lostvotes('newhamp') for example.
https://workupload.com/file/s7s8SARjjqh

[pede444wow] I took the json files that are included here, and wrote a python script to convert the critical data to one csv file, so you can analyze it in excel:

python script: https://pastebin.com/Q6nTP04N

result csv file: (download and save to csv file, then open in excel)
https://pastebin.com/FQuxxTvK

[montag] Here's a GitHub repo of the same data source taken at incremental time periods. https://github.com/favstats/USElection2020-NYT-Results

[ComeAndTakeIt_Texas] Hey TrumanBlack, I crunched the 27/28 timestamp data you posted (specifically this - https://i.maga.host/wGuVGZQ.png), and uploaded a spreadsheet analysis here (https://i.maga.host/xbwnVuk.png). I do a worst-case and best-case rounding error to generate Max T Vote, Min T Vote, and Max B Vote and Min B Vote that shows if you have 0.578 share, the max number that would represent would be 0.57849999999, and the min number would be 0.5775. The specific pic highlighted here allows no possible way whatsoever that Trump did not lose votes. The smallest number of votes he could have lost assuming in 27 there is a worst case rounding error and in the 28 step there is a best case rounding error (extremely unlikely), Trump lost a 4846.353. In worst case, he lost 5994.627 votes. There is literally NO way anyone can explain this away. They can also not explain that away as an asynchronous issue, as the timestamp itself is later (1), and (2), the total vote count increased. This single time step is proof alone.

[warpigpede] Re: the data displayed inhttps://i.maga.host/wGuVGZQ.png

I calculated number of lost Trump votes as 5738.57, exactly 1% of the total number of votes (573857) at record 27:

votes 27: 573857

trump fraction: 0.578

trump votes: 331689.346

biden fraction: 0.401

biden votes: 230116.657

votes 28: 574417

trump fraction: 0.568

trump vote: 325950.776

biden vote: 232985.942

biden fraction: 0.406

votes change: +560

trump votes change: -5738.57

Exactly 1% is an awfully curious value. I wonder if it is consistent across the entire dataset
